EXPERIENCE

Saks Global

Feb 2026 – Apr 2026

Software Developer | Service Cloud Application (SFSC)

- Designed and shipped **pause/resume call recording** using **Salesforce Lightning Components**, **AWS Lambda**, and **Amazon Connect APIs**, improving compliance control across **100+** enterprise agents.
- Architected an **After-Call Work (ACW) monitoring** solution, contributing to an estimated **15%** improvement in post-call operational efficiency and real-time workflow visibility.
- Developed **5+ custom Salesforce Service Cloud components** and **Apex backend services** to enhance customer support workflows for a multi-million dollar retail enterprise.
- Optimized **CRM automation workflows** and debugged production defects, reducing recurring system issues by **~20%** via root-cause analysis; utilized **AWS (Lambda, S3, IAM)** for scalable cloud automation.

Saks Global

Jan 2025 – Jan 2026

Technology Intern | Service Cloud Application (SFSC)

- Contributed to **Salesforce Service Cloud** development over **12 months**, building expertise in **Apex**, **Lightning Web Components (LWC)**, and **Aura Components** for enterprise CRM customization.
- Built **CRM automation workflows** and internal tooling, reducing manual effort in **3+** key processes; resolved **20+** production service tickets improving platform stability.
- Worked with **AWS (Lambda, S3, IAM)** and **Amazon Connect CTI** integrations; gained full-cycle **SDLC** experience across development, testing, deployment, and maintenance.

EDUCATION

Siddaganga Institute of Technology, Tumkur

2021–25

Bachelor of Engineering in Electronics and Communication

CGPA: 8.20

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, C/C++, Apex, SQL

Cloud & Tools: AWS (Lambda, S3, IAM), Git, GitHub, VS Code

Platforms/Frameworks: Salesforce Service Cloud, Amazon Connect, Lightning Web Components, Aura Components

Core Skills: CRM Development, API Integration, CTI, Cloud Automation, Data Structures & Algorithms, OOPs

PERSONAL PROJECTS

Indian Stock Market Analysis

2023

Data Analytics & Machine Learning Project | Python, Pandas, NumPy, Matplotlib, Seaborn, Linear Regression

- Analyzed **159 companies** over **4 years** using **Exploratory Data Analysis (EDA)**, applying data cleaning and transformation to surface actionable investment insights.
- Built and evaluated **linear regression models** to predict stock prices using **moving averages**, **trading volumes**, and **correlation matrices**, achieving **~18%** accuracy improvement over baseline.
- Produced **20+ visualizations** to identify sector-wise trends, volatility patterns, and top-performing stocks across the dataset.

MediSage – Smart Medical Assistant

2024

AI/Healthcare Automation Project | Python, Raspberry Pi, Arduino, OpenCV, SVM, Speech Recognition

- Developed an **AI-driven humanoid robot** integrating **SVM-based disease prediction**, **object detection (OpenCV)**, and **speech recognition** into a unified healthcare assistance system.
- Engineered **autonomous navigation** enabling the robot to guide patients across **hospital departments** with **zero manual intervention**.
- Designed a **diagnostic chatbot** that reduced average patient triage time by an estimated **30%** by automating symptom collection and department routing.
